

COMPANY PROFILE

LEMIS Process is an international manufacturing and service organization, that specialises in the design and supply of online; in-line; in-tank and others process analysers for petroleum, petrochemical, environmental, food and beverage, pharmaceutical, marine and power and general chemical industries.

We provide full range of Density Meters, Viscosity Meters, Level Gauges, Flow Meters and various combinations for Density - Viscosity - Flow - Level solutions.

LEMIS Process instruments are custom designed to suit the application or process and the clients objectives. Custom design ensures that the optimum performance is achieved and that process benefits are maximised.

LEMIS Process is a Company that prides ourselves on quality and customer satisfaction, as our customers come first. And we are always trying to find new ways in developing our products, so that our customers can have the most up-to-date technologies for their density and viscosity measurement requirements.

Our company was founded in 1988, ever since then we are involved in developing and manufacturing of sophisticated measuring instrumentation.

Our first instrument was portable density meter D-921 - for taking measurements in the tanks without sampling. The need for this instrument was generated by the fact that there were no portable density meters on the market, which allowed measuring density and temperature directly in tanks without sampling. Since then and till now – our company is the unique manufacturer of the similar equipment in the world.

The first units were available to petroleum companies in 1994. In 1996 the second generation of the portable submersible density meters - DM-230 series - was created.

To provide high quality products to customers since March 2002 our company is ISO 9001: 2008 certified by Det Norske Veritas.

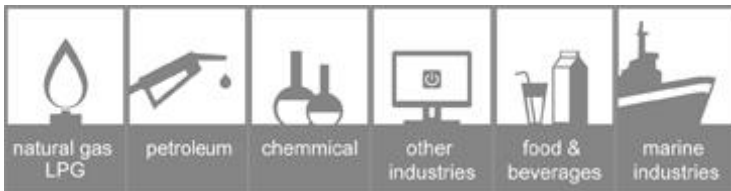

Our Company develops quickly and now in our portfolio is available full range of industrial Density Meters, Viscosity Meters, Level Gauges, Flow Meters and various combinations for Density - Viscosity - Flow - Level solutions.

Exclusively company R&D engineers, possessing unique knowledge and experience in industrial instrumentation area, develop all our instruments.

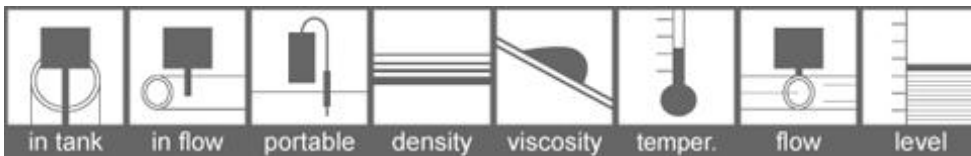

To satisfy requirements of our international customers and provide quick deliveries and technical support we open new branches, which are united under the general brand – LEMIS Process.

PRODUCTS - Industrial applications

PRODUCTS - Measurement solutions

We develop, manufacture and market instrumentation solutions for process industry. Whether your requirements are for the flow, in tank or in-field measurements, we provide a tailored solution for the total customers satisfaction.

We intend to build serious relationships, providing to our customers reliable solutions, efficient products, reactive and proactive. We provide a custom package tailored to our customers for your industries requirements.

Our products save time and in the long run save our customers money, as our products do not require laboratory time as you can take your measurements straight in the tank also our products eliminate human error.

All our products come with tech support and contain instruction manual and software.

All measuring equipment provide a custom tailored solutions for total customer satisfaction.

As we develop our products, our customers will always get the latest technologies for their requirements as the customer comes first at LEMIS process.

In tank

In-tank Density Meters
DC-40 SERIES

In-tank Viscometers
DC-41 SERIES

In-tank Density and Viscosity Meters
DC-42 SERIES

In-tank Density Meter
DC-40 TRIO

Process Density and Level Gauge
DLG-400

In flow

Low Flow Rate Density Meter
DC-30 SERIES

Low Flow Rate Viscometer
VC-30 SERIES

Low Flow Rate Density & Viscosity Meter
VDC-30 SERIES

In-flow Density Meters
DC-50 SERIES

In-flow Viscometers
DC-51 SERIES

In-flow Density and Viscosity Meters
DC-52 SERIES

In-flow Gas Density Meter
DC-60

Portable

Portable Submersible Density Meters
DM-250 SERIES

Portable Submersible Density Meter
DM-250.2

Portable Submersible Viscometers
VM-250.1

Portable Submersible Viscometer
VM-250.2

Portable Submersible Density & Viscosity Meters
VDM-250 SERIES

Portable/Laboratory Density meter
LPG

Portable/Laboratory Density meter
LNG
